Product Name: Dotless Sideview IP66 Rated LED Tape 12V 10W 144 LEDs Per Metre

Kit Contents

- LED flexible dotless strip light
- 3M Surface Prep Wipe
- 1 X Spare end cap
- 1 X Corner connector
- 1 X Small tube of silicone

Important Safety Information

This product is powered by an LED driver (supplied separately). The LED driver must be installed by a qualified electrician.

Installation

1. Ensure the surface is clean and dust free by using the 3M surface prep wipe. Allow 2 minutes for the surface to dry.

2. If you need to reduce the length of the strip, partially peel back the red tape on the reverse of the strip.

3. Cut the strip at the indicated cut points using a pair of sharp scissors.

Product Name: Dotless Sideview IP66 Rated LED Tape 12V 10W 144 LEDs Per Metre

Installation

4   Using the supplied silicone, place a small amount inside the spare end cap and fit to the cut end of the strip.

5   Peel back the remaining red tape and install the LED strip as desired.

6   Plug the power lead into the connector block on the LED driver.
